

How to use your Montana Access card in an ATM (Automated Teller Machine) to withdraw cash benefits

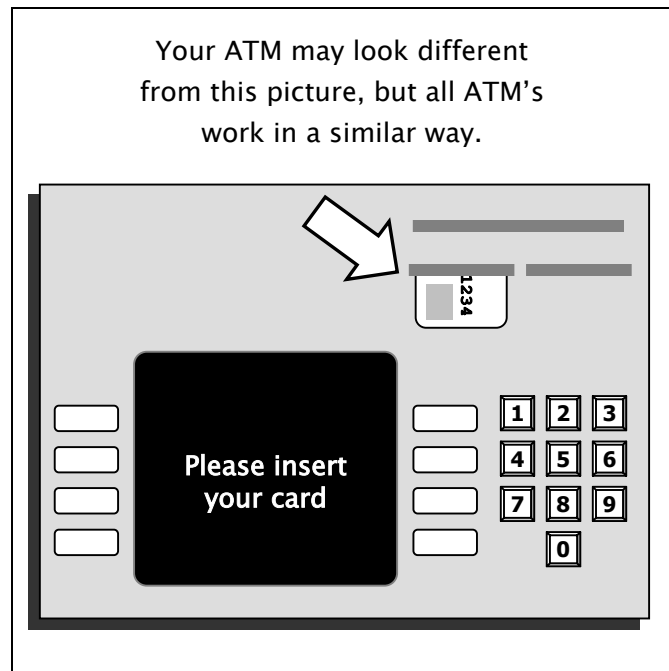

Look for one of these
logos on the ATM:

- 1** Insert your Montana Access EBT card, following instructions on the ATM.
- 2** Then enter your secret PIN (Personal Identification Number) using the keypad.

- 3** Choose "Balance Inquiry" by pushing the corresponding button.

This is an easy way to make sure that your card works in this ATM, and that you have cash available. There is no fee for a balance inquiry.

- 4** If you have cash available, choose "Withdraw," and then "Checking."
Even though this isn't a checking account, this tells the ATM to take money from your TANF Cash account with your Montana Access card.
- 5** Select the amount of cash that you want.
ATM's can dispense cash in multiples of \$5, \$10, or \$20 only. They also may limit how much you can withdraw at one time.
- 6** The ATM will make sure you have enough money. It will also charge a fee.
You will have a chance to cancel the withdrawal if you don't want to pay the fee. If you agree to pay the fee, select Yes/OK and go on to Step 7.
- 7** The ATM will dispense your cash and a receipt. Be sure to put the cash, your card, and the receipt in your purse or wallet right away!
